

Reel & Drawing Competition Portal — Service Requirements

Infrastructure and third-party services required to run the portal in production · 16 September 2026

1. INFRASTRUCTURE

SERVICE	USED FOR	COST (APPROX.)
AWS Lightsail — 2 GB instance Region: Mumbai (ap-south-1)	Runs the portal application (Node.js). School registration, entry submission, evaluation desk, admin dashboard.	₹1,700 / month
AWS RDS for PostgreSQL — db.t4g.micro Region: Mumbai (ap-south-1)	Central database — schools, participants, entries, evaluation scores, status pipeline. Daily automated backups enabled.	₹1,300 / month
Cloudflare R2 — object storage	Storage of all reels (video) and drawings (images). Private bucket with signed links; no public listing. No download/bandwidth charges.	₹350 / month (at 250 GB)
Domain name + SSL certificate	Public web address of the portal and HTTPS security. SSL certificate is issued free.	₹1,000 / year

Why media is stored separately: reels are watched repeatedly by schools, district officers and juries. On Cloudflare R2 these downloads are free of charge, whereas on standard cloud storage the same usage would add roughly ₹8,000 per month in bandwidth billing. All data remains hosted in India.

2. EMAIL — OTP VERIFICATION & NOTIFICATIONS

SERVICE	USED FOR	COST (APPROX.)
Brevo — transactional email account	Email OTP at school login/registration, registration confirmation and status-change notifications to schools.	Nil (300 emails/day)

Required to activate:

- One official sender email address (to be verified once by the Department / agency)
- API key from the Brevo account

3. SMS — OTP VERIFICATION

As per TRAI regulations, OTP messages in India can only be delivered through a registered DLT account. The following registrations are mandatory before SMS OTP can be switched on.

REQUIREMENT	DETAILS	COST (APPROX.)
DLT Principal Entity registration	Registration of the sending organisation on the operator DLT portal. Documents: entity PAN, GST certificate or authorisation letter, letterhead, and authorised signatory ID.	₹5,900 one-time
Header / Sender ID	Six-character sender name shown on the SMS (for example, DOEDEL).	₹5,900 one-time

OTP template approval	Approval of the exact OTP message text. Approval takes 24–48 hours.	Nil
MSG91 — SMS gateway account	Delivery of OTP messages; prepaid balance.	₹0.15 per SMS ≈ ₹450 for 3,000 OTPs

Timeline: DLT registration and template approval take 3–7 working days. If the Directorate already holds a registered DLT header, it can be used directly and SMS OTP goes live immediately. Until SMS OTP is active, the portal will verify schools through email OTP, which is ready to use.

4. COST SUMMARY

HEAD	INCLUDES	AMOUNT
One-time	DLT Principal Entity registration + Header / Sender ID registration	₹11,800
Recurring — monthly	Application hosting, database, media storage, email, SMS usage	₹3,800 / month
Recurring — yearly	Domain name	₹1,000 / year
Estimated first-year total	One-time registrations + 12 months of services	₹58,400

Monthly figures assume approximately 1,000 participating schools and 250 GB of stored reels and drawings. Media storage cost scales with the volume of entries received.

5. REQUIRED FROM THE DEPARTMENT / CLIENT

1. Approval of the portal domain name
2. Existing DLT header details, if the Directorate already holds one; otherwise approval to register a new Principal Entity and Sender ID
3. One official email address to be used as the sender for OTP and notification emails
4. Official logo and branding files for the portal
5. School master list — District, School ID and school name
6. Confirmation that hosting in the Mumbai (India) region meets the data residency requirement
